

MANAGED AZURE VIRTUAL DESKTOP (AVD)

REIMAGINING THE FUTURE OF WORK

The way we work changes at an incredible rate and pace. Not just with technology, with people and organisations too. All businesses are digital, global and non-stop, accelerated by the widespread adoption of technologies like Mobile, Cloud, IoT and Big Data – not to mention the worldwide pandemic which accelerated digital transformation activities by 3-4 years according to a 2020 McKinsey study.

As a result, new and disruptive business models are emerging as your end users and clients are connected in ways like never before. Insentra's Managed AVD Service allows you to stay ahead of these trends and revolutionise the way end users work.

YOU CAN ACHIEVE...

- Customer loyalty
- Employee productivity
- Predictable budgets
- Reduced cost and efficiency
- Business agility
- Security and compliance
- IT focus
- Return on your investment
- Risk management

HERE'S HOW

DELIVER ANY APPLICATION

Unify apps and data in secure digital workspaces which enable people to work on any device, anywhere at any time.

MODERNISED WORKSPACE

Manage secure digital workspaces in a faster and simpler way from the cloud and deliver a unified workspace experience with improved security.

POWER INTELLIGENT EXPERIENCES

Intelligently connect people, data, systems and 'things' to make more informed decisions and automate additional business processes.

MANAGED AVD

Insentra's AVD Managed Services helps you achieve a Digital Transformation, as well as business innovation, workforce productivity, new ways of working, and control of risk and security. Insentra does this by using solutions which allow you to deliver any application, embrace a modernised workspace, and power intelligent experiences.

Insentra can help you achieve the workspace of the future that will energise people and organisations to focus on work that's more about accomplishing and advancing than administering and maintaining. This workspace will let them place workloads in all clouds to achieve the best possible performance. Businesses will be free to work outside the constraints of the clock and be able to create new business models and accelerate innovation.

DELIVER ANY APPLICATION

- Centrally controlled apps, data and full virtual desktops
- Personalised access based on role, location and device choice
- Narrowed attack surface for improved security and risk management
- Intelligent, context-aware experiences through network integration and visibility

MODERNISED WORKSPACE

- Unified AVD workspace experience with improved security
- Integrated admin control across workspaces, application/desktop groups and users
- Reduced need for specialised IT skills

The market has evolved significantly in the past years as globalisation has impacted and changed how we connect to the world. Users have also changed and are now connected in ways which make them more informed and less loyal. Their engagement is driven by excellent customer service and a positive experience.

Business staff also operate differently now. More than half of most workforces are comprised of millennials who are digital natives, technologically savvy and believe technology should just work.

Coupled with technology mega trends such as Cloud, Mobile, IoT and Big Data, businesses are expected to meet the expectation of the market, customers and staff and are under pressure to digitise and offer new ways of connecting people. All leaders know failing to do so could result in becoming obsolete.

POWER INTELLIGENT EXPERIENCES

- Predictive insights and visibility for better error detection & remediation
- Enhanced services based on intelligent data collection and analysis
- Data analytics to complement human judgement

**WE ARE AND ALWAYS WILL REMAIN
A PARTNER OBSESSED COMPANY**
