

MAP ONE

Insentra's MapOne service provides an objective, independent perspective on your business by understanding where you have come from and where you need to get to in order to transform or modernise. MapOne provides a One-Page Strategic Plan (OPSP) detailing what you need to execute and how to ensure you capitalise on existing investments.

MAP ONE

While your company is growing and adding capabilities necessary to compete in the market, it is crucial to identify and address critical business challenges.

Growing and changing businesses regularly encounter the following roadblocks:

- **Time and knowledge** – Technical teams are often caught up in their day to day activities and cannot plan strategically, resulting in ad hoc and typically tactical/ reactive actions
- **Lack of diverse skills** – Specific projects may require specialised skills across architecture, cloud strategy, data, governance and security
- **High cost of keeping architects on staff** – IT architects are in high demand and their capabilities are only needed periodically, therefore finding and employing them full-time can be a costly luxury.

EVALUATION & STRATEGY VALIDATION

Through a series of onsite workshops, meetings, interviews, and interactive sessions with your team, our Architects will:

- Understand the strategic objectives of your business and how the technology you use will facilitate those outcomes
- Evaluate your current strategy, architecture, systems, applications, process components and their integration
- Provide support across a spectrum of governance, implementation, architecture and integration requirements.

ROADMAP

Upon completion of the onsite workshops and collation of findings, you will receive a priority focused roadmap outlining required focus areas and key priorities. This strategic plan identifies the steps required to achieve the desired business outcomes and serves as a milestone driven communication tool to allow for future budget planning.

The roadmap varies from business to business but will always include:

- Estimated timeframe
- Rough order of magnitude cost to perform the changes
- Outcome statements

A DESIGNATED ARCHITECT INVESTED IN YOUR BUSINESS OUTCOMES

Leveraging MapOne puts control into your hands, identifies major pain points, validates and improves strategy and saves cost and time. Your business will have access to a designated experienced, reliable, independent advisor invested in your outcomes and not biased by any vendor solution.

EXAMPLE ROADMAP

KEY
