

Long serving Microsoft Consulting specialist Michael Webster recently joined Insentra to drive the growth of the Cloud & Collaboration Services practice.

Michael is rapidly growing his team of specialists on the back of increasing demand from our partners. "We are seeing growing and significant need for deep expertise across much of the Microsoft technology stack, and in particular around O365, Azure, SCCM and Hyper-V. Our ability to attract pitch hitters to our business is exciting and allows us to grow the team rapidly to meet the demands from our partners."

"Our services leverage Microsoft solutions and technologies and today we have deep skills across Exchange, SCCM, O365, Lync, SQL, and migrations to Azure. Our Microsoft consultants have delivered some of the most complex implementations and migrations in the country".

"At a personal level, working with Insentra's unique business model gives us the opportunity to add value to many different end users across many industry sectors through the many integrators and resellers we work with. The variety of work is so exciting and presents my team with a unique work environment where they remain challenged and developing at an exponential rate."

About Michael:

Michael has over 20 years' experience with Microsoft solutions and has assisted many companies to implement these technologies across government, private sector & not-for-profit organizations. Michael has a broad knowledge of Infrastructure as a Service (IaaS), Microsoft collaboration tools (Lync & Exchange) & private cloud (System Centre & Hyper-V).

Prior to working at Insentra Michael consulted for Microsoft Australia to implement multiple solutions across government and private sector throughout Australia. Previous to this he was employed as a Senior Solutions Consultant at a large IT System Integrator.

Michael is an accredited Microsoft consultant holding multiple vendor certifications.
