

Nulia Case Study: Insentra

Driving Ongoing Adoption of Office 365

Nulia Works enabled Insentra to significantly increase Office 365 usage throughout their company and make the most of existing software assets, thus improving productivity and collaboration globally

THE CHALLENGE

Overall usage of Office 365 features and applications was inconsistent between employees, departments, and processes, and user engagement was low

RESULTS

- Increased usage of Office 365 tools in more efficient ways
- Improved collaboration and communication through increased Teams usage
- Increased OneDrive and SharePoint usage

THE NULIA SOLUTION

By applying machine learning & AI to personalise activities for each user, Nulia Works helped users deeply engage with and consistently use tools like Teams, SharePoint, and OneDrive

BENEFITS

Nulia Works improved the baseline of Office 365 skills, usage, and confidence across the entire team, and enabled better international collaboration across time zones and locations

WHAT'S NEXT?

To stay current and maintain their digital skills, Insentra has identified additional Skills & Outcomes to continue to improve the ability and confidence of its employees in Office 365

“Nulia Works has had a significant impact to the productivity of our team and their usage of Office 365, as well as improving the way we collaborate on documents in real time across multiple geographies”
