

MANAGED AZURE AND ANALYTICS

AN OPTIMISED & COST EFFICIENT AZURE ENVIRONMENT

After moving to Azure, you need to be concerned about optimising your costs, getting efficiency out of your compute resources, adhering to compliance requirements, and managing risk and security.

Insentra provides a Managed Service which acts as an extension to your IT team. The team of Enhanced Support engineers monitor, manage and report on your Azure hosted environment 24 hours a day, 7 days a week, providing you with deep insights into the effective configuration of your Azure stack.

BENEFITS OF MANAGED AZURE

- Azure resource optimisation
- System productivity and visibility
- Business agility and efficiency
- Security and compliance
- Cost containment

WHAT OUTCOMES CAN YOU EXPECT?

IAAS MONITORING

Insentra will monitor, administer and manage the Azure resources, and manage the remediation of identified issues through change management.

ADVISORY SERVICES

Advisory review to optimise your Azure resources for high availability and performance, compliance against your industry's regulatory requirements.

OPTIMISATION AND COST MANAGEMENT

You will receive an analysis of metrics and recommendations for the optimal performance and configuration of any unused resources, and remediation for best use.

SECURITY AND COMPLIANCE POSTURE

Insentra will advise and highlight any compliance challenges, threat detection and DMZ violations that are impacting your Azure tenant and then remediate these on your behalf.

MANAGED AZURE AND ANALYTICS

Insentra's Managed Azure & Analytics provides your team with a dashboard view and recommendations on common problems and issues which your tenant might be experiencing. By proactively targeting these issues, you can reduce support calls into your service desk and improve productivity of your users, gain efficiencies in your compute and achieve better cost containment.

Insentra's Managed Azure and Analytics will provide you visibility to make informed decisions across compliance and security vectors with the following outcomes:

Business have move infrastructure workloads into the cloud and it's paramount that these workloads are configured and managed effectively allowing for a superior end user experience.

Insentra will manage and govern the cloud workloads giving you peace of mind that your security and compliance requirements are in hand and that business is getting the best return from their cloud assets.

SERVICE	OUTCOME
Azure Administration	Manage and Administer infrastructure and environment utilisation, monitor and react to error states, and report on service degradation
Advisory Services	Monthly Advisory Report with recommendation for optimal performance. Remediation and reduction of wasted compute resources
Optimisation & Cost Management	Implement financial governance and controls in your tenant and optimise your costs. Insentra will advise you on your instance restrictions, right sizing and removal of idle resources
Security & Compliance Posture	Advisory and dashboard generation highlighting compliance challenges. Review and recommend on Azure Security Centre recommendations, then remediate for continuous service improvement
