

RAPIDLY MODERNISE AND MANAGE APPLICATIONS AT SCALE

SAY HELLO TO RIMO3 CLOUD

The **Application Modernisation Platform** designed to help with the migration, management and modernisation of apps. Rimo3 Cloud provides deployment ready MSIX packages for physical, virtual, or cloud-based workspaces. And the technology to manage and keep up with continuous change.

It's an automated, cloud-based platform that will discover, modernise and manage applications.

PLATFORM SUCCESS

- Unattended and automated 24/7/365
- Reduce packaging effort from hours to minutes
- Scalable with fast deployment
- Double success rate for conversion and remediation achieved against traditional tooling, including Microsoft's MSIX conversion tool

DISCOVER APPS

Discover suitable candidates for MSIX conversion and moving to Azure Virtual Desktop, and uncover early foresight on application compatibility, performance, and functionality completely unattended.

MODERNISE APPS

Remove the complexity in modernising applications. Use *Intelligent testing* to understand the package pre-conversion, convert the application, test the MSIX package post-conversion - if it fails, apply automated remediations

MANAGE APPS

Deploy fully tested quality packages with complete confidence. Prior to deployment, continually test applications as new versions of Cumulative Updates and Windows are released in your environment.

Use the Rimo3 Cloud automated process to remove the complexity of modern application transformation to MSIX at scale, supporting modern application deployment and cloud VDI

WHAT IS MICROSOFT SAYING?

"Our customers are increasingly turning to Azure Virtual Desktop as they turn to remote workspaces. With solutions like Rimo3's automation platform, organisations can easily onboard applications into their environments, proactively understand the impact of changes, and roll out new applications and updates with minimal user interruption."

Kam VedBrat, General Manager, Azure Virtual Desktop
