

NetBackup Appliance Readiness Service

In today's IT security climate, businesses require services over and above the base services offered by information management vendors. By replacing standard IM services with NBARS, Insentra can provide maximum ROI to customers by ensuring they are receiving the best possible IM advice for their continued or new investment.

What's included?

Readiness and Planning Workshop

Insentra is able to run a readiness and planning workshop which prepares your business on multi-levels. Specifically, the NBARS workshop includes but is not limited to:

- Understanding of pain points at operational, functional and product related levels
- Appliance connectivity (Network and SAN) and data transfer paths
- Discussion on Backup and recovery paradigms including approaches to protection for virtualization, approaches to application and database recovery, instant Recovery and Granular Restore Technology (GRT) Database protection options (Oracle CoPilot)
- Disaster Recovery requirements including retention requirements and SLA's for RPO and RTO
- Visibility into how much time is spent managing Backup surrounding operation processes and time spent operating vs remediating
- Entitlement review for licensing models and visibility around what you're entitled to and what you're currently leveraging

Pre Deployment Environment Review And Readiness Statement

Once the initial workshop is complete, Insentra will then provide a pre-deployment environment review and readiness statement.

Specifically, this means NBARS will provide:

- High level review of core architecture (Master and media servers) with NBU Versions compatibility, media management (disk and tape) and appliance code versions
- Entitlement to consumption analysis and recommended changes
- Documents containing steps to successful deployment and integration, requirements - Pre deployment activities, recommendations on
 - Upgrade requirements
 - Code uplifts
 - Core configuration changes
 - Summary of recommended changes (if any)
- Method of Procedure for deployment and configuration

Small	\$3000
Medium	\$4500
Large	\$7500

Order of Magnitude Pricing

- Anticipate depending on size anywhere between 2-5 days

Note: If NetBackup upgrade is required, fixed price SOW/Quote will be provided
