

MICROSOFT 365 COPILOT READINESS ASSESSMENT

Accelerate your path to Microsoft Copilot Readiness

BUSINESS CHALLENGE

Generative AI has permeated the realms of mainstream media and culture, with the potential to revolutionize work and jump-start creativity. Microsoft Copilot allows organizations to harness the potential of this groundbreaking technology. Do you find yourself enthusiastic about the prospects of integrating Artificial Intelligence (AI) into your business operations while harboring apprehensions regarding the associated security and privacy challenges? You are not alone.

Do you have a deep understanding of roles and personas in your organization and their associated workloads to know who can make the most of Microsoft's AI capabilities? Such knowledge will increase your ROI and enable early success stories to drive ongoing change.

“Success favors the prepared. The importance of being ready lies in seizing opportunity when it knocks and shaping your destiny with purpose.”

HOW WE GET YOU READY FOR COPILOT

Through a series of workshops, Insentra will help you better understand how to adopt Microsoft 365 Copilot and partner with you to ensure your organization has a customized adoption roadmap. Our evaluation goes beyond the surface, highlighting key areas where optimization and information governance will be necessary for a successful Copilot integration. We focus on the following:

BUSINESS VALUE ASSESSMENT:

Defining the Copilot vision for your business, identifying personas, high-value use cases and licensing and organizational readiness.

TECHNICAL READINESS ASSESSMENT:

Examining your Microsoft 365 environment, information governance data management, security identifying technical prerequisites.

CHANGE READINESS AND ADOPTION ROAD MAPPING:

Recommendations to facilitate a successful Microsoft Copilot adoption and any organizational changes required.

DURATION:

2-4 Weeks

WORKSHOP HIGHLIGHTS:

- Learn about the Microsoft 365 Copilot vision, technical requirements and productivity promise
- Gain a comprehensive understanding of steps you need to take to prepare for Copilot
- Receive actionable reports detailing migration approaches where required, data risks and remediation recommendations
- Receive recommendations on data privacy concerns to ensure comprehensive compliance and security controls
- Discuss a roadmap to safely and securely reap the benefits of Microsoft 365 Copilot

KEY OUTCOMES

With Insentra's Microsoft 365 Copilot Readiness Assessment, you receive:

- An understanding of the personas who can leverage Copilot
- License gap plan and recommendations including features enabled with license uplift and how they apply to a Copilot rollout for defined personas
- Review of current group membership and SharePoint site access report
- Recommendations relating to data governance and security to facilitate safe and secure Copilot usage
- Defined roadmap outlining steps required to prepare your organization for Copilot, including migration approaches for non-cloud data
- Recommendations on next steps to prepare and drive adoption including establishment of a Copilot Center of Excellence (CoE) to prepare and drive adoption

WHY CHOOSE INSENTRA

Our team of Microsoft-certified experts work with you to prepare your organization to leverage Microsoft Copilot and realize the tangible impacts to collaboration and productivity while ensuring you are protected from the risks including unauthorized data leakage and inappropriate data access.

POWER HOUR: KICK START YOUR COPILOT JOURNEY

Book a complementary one-hour consultation to get started on your Copilot readiness journey. Choose from three options to help get the conversation started:

WHAT IS COPILOT AND KEY CONSIDERATIONS

Want to master Microsoft Office applications, make stunning reports with ease and effortlessly enhance your presentations? Microsoft 365 Copilot is your productivity booster, offering smart suggestions and automation within Word, Outlook, and PowerPoint all based on your data.

What we cover:

- Introduction to Microsoft 365 Copilot
- Uncover how Microsoft 365 Copilot significantly boosts user efficiency, ensuring you get the greatest productivity gains
- Overview of pre-requisites, and adoption approach
- Identify your organizations specific needs and next steps

PREPARE YOUR DATA AND ENVIRONMENT FOR COPILOT

Microsoft 365 Copilot builds on top of Microsoft's data security and data privacy; however, it is vitally important to ensure your data is current and appropriately permissioned and secured.

Use the power hour to understand how to prepare your data for Copilot and understand ways to detect and prevent oversharing with the goal of adopting a 'Just Enough Access' position.

Areas covered include:

- Best practice data governance and security approaches
- Overview of tools available to achieve the required governance and security best practices
- Overview of Information Architecture and its importance for an effective Copilot experience

UNDERSTAND DEPLOYMENT SCENARIOS AND OPTIONS FOR COPILOT

Unlocking the power of Copilot requires an understanding of the personas and use cases in your organization.

Effective adoption requires a focused change management and enablement approach.

What we deliver:

- Overview of persona definitions
- Understand the Copilot family and deployment scenarios
- Adoption and change management considerations to ensure effective implementation and usage
